

DIGITAL TWIN

THE SMART WAY OF DEVELOPMENT.

YOUR ADVANTAGE.

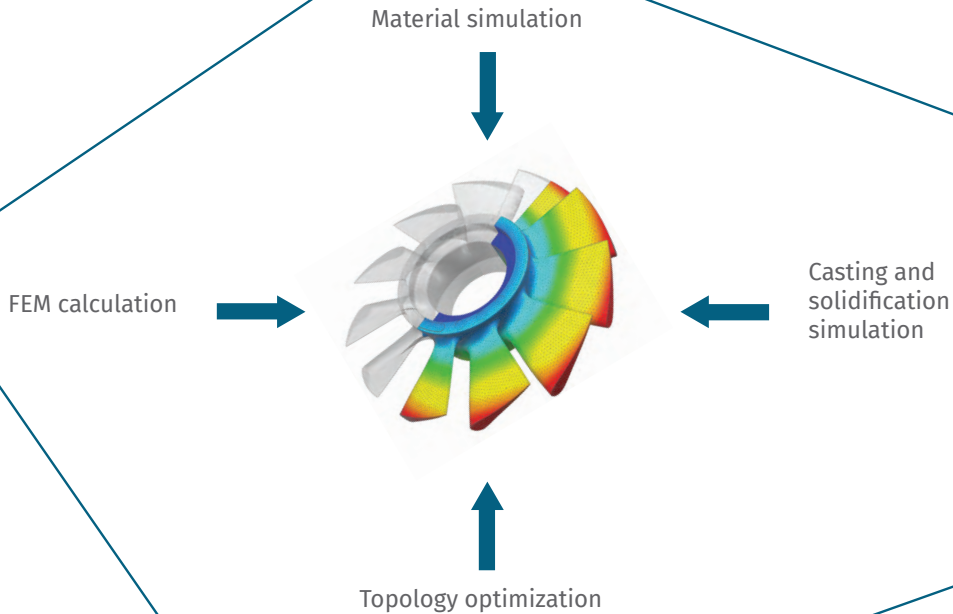

We optimize your component already before its actual realization and improve the process capability and cost structure.

Our service:

- / Recommendation of material
- / Feasibility analysis
- / Parts optimization

SMART SERVICE.

- / The Digital Prototype supports and simplifies the development and optimization of your construction at FEINGUSS BLANK
- / You profit by our development know-how already when sending your construction data
- / Each part will be checked in our house for optimized feasibility
- / By means of the Digital Prototype, simulations can be executed like solidification simulations and stress simulations, and the future part can be further improved

GOAL OF THE PRODUCT DEVELOPMENT IN INVESTMENT CASTING.

- / Involving of longtime know-how
- / Minimizing developmental periods
- / Reducing weight and therefore material costs
- / Saving serial production start-up costs

ADDITIVE MANUFACTURING.

After having successfully optimized parts and processes we even more quickly achieve marketable product solutions with the support of additive production procedures.

Here we offer:

- / 3D-print of tools, wax and casting parts
- / Process examinations
- / Machining and mounting trials

FEINGUSS BLANK GmbH

Industriestraße 18 · 88499 Riedlingen
